

CHAPTER 11 SECTION 3 D READING LIFE DURING WARTIME ANSWERS

[Download Complete File](#)

How did Civil Wartime affect southern slaves? Freed Slaves during the Civil War Most slaves were in fact "liberated" when the Union Army eliminated the local southern forces that kept them in slavery. They simply left their plantations to seek their freedom under the protection of northern military units.

How did wartime affect taxation in the North? Admittedly, the war also demanded some economic sacrifice in the North. The Northern government had funded its military by raising taxes and borrowing money. People living in the North emerged from the war paying income tax for the first time. Like the South, the North had also printed additional paper money.

How did the war hurt the South economically by leading to the collapse of its economy? The southern economy collapsed after the war. There was widespread destruction of lands, communities were wiped out, and the entire social system was uprooted. Without slaves, landowners resorted to sharecropping, a system that did not encourage soil conservation or implementation of new crops.

What were some things accomplished by the war Industries Board? The organization encouraged companies to use mass-production techniques to increase efficiency and urged them to eliminate waste by standardizing products. The board set production quotas and allocated raw materials. It also conducted psychological testing to help people find the right jobs.

How did the Civil War affect the slaves in the South? The war increased the importance of slaves with industrial skills in the upper South's hiring market; the demand for hired field hands also increased as white men joined the Confederate

army.

How did the Civil War turn into a war about slavery? The war began because a compromise did not exist that could solve the difference between the free and slave states regarding the power of the national government to prohibit slavery in territories that had not yet become states.

How did the Civil War affect the North's economy? The Union's industrial and economic capacity soared during the war as the North continued its rapid industrialization to suppress the rebellion. In the South, a smaller industrial base, fewer rail lines, and an agricultural economy based upon slave labor made mobilization of resources more difficult.

How did the Civil War affect African American soldiers in the North? Despite promises of equal treatment, African Americans were relegated to separate regiments commanded by White officers. Black soldiers received less pay than White soldiers, inferior benefits, and poorer food and equipment.

What were the advantages of the North and the South in the wartime? The Union had many distinct advantages, such as manpower, industry and political structure. But the Confederacy was able to compensate for most of these, and they had some of their own strategic advantages, like military leadership, the Mississippi River and playing on the home field (so to speak).

How did slavery shape social and economic conditions in the Old South? Although slavery was highly profitable, it had a negative impact on the southern economy. It impeded the development of industry and cities and contributed to high debts, soil exhaustion, and a lack of technological innovation.

How did the Civil War affect soldiers and civilians? The Confederacy mobilized large numbers of men into the army, leaving many White women and children to fend for themselves, many ultimately becoming widows or orphans by the war's end. In the countryside, armies destroyed or appropriated property, seized food, burned fences, and turned houses into hospitals.

What happened to the South during the Civil War? After four years of conflict, the major Confederate armies surrendered to the United States in April of 1865 at

Appomattox Court House and Bennett Place. The war bankrupted much of the South, left its roads, farms, and factories in ruins, and all but wiped out an entire generation of men who wore the blue and the gray.

How did the War Industries Board respond to the economic challenges of the wartime economy? The War Industries Board increased manufacturing production by 20% ensuring that the appropriate wartime supplies were produced for American troops. The board effectively transitioned the country from its previous economy to a wartime economy.

How did the War Industries Board affect the American economy? The biggest influence it had over the economy is that it increased the overall production by 20 percent to keep the regular economy at the pre-war level, while also producing additional amounts for American troops.

In what ways did the war affect American citizens? It also affected the lives of Americans on the home front. Much of this impact was associated with mobilizing for the war. People moved to new places across the country to work and to train and their lives changed. Factories re-tooled and ran around the clock to produce weapons and other military supplies.

What happened to Southern slaves after the Civil War? During Reconstruction, former slaves--and many small white farmers--became trapped in a new system of economic exploitation--sharecropping. Lacking capital and land of their own, former slaves were forced to work for large landowners.

How did the war affect slaves in the Confederacy? As the Confederate Army weakened, the Confederacy's ability to assert racial control lessened and large numbers of slaves were escaping to federal lines every day. Even as the large Armies surrendered, some Confederates held on to hope for victory and for the reassertion of slavery throughout the South.

What was the effect of the Civil War on the southern states? Because most of the war was fought in the South, the region was devastated physically and economically. Helping freedmen and creating state governments loyal to the Union also presented difficult problems that would take years to resolve.

What happened to African Americans during the Civil War? Nearly 40,000 black soldiers died over the course of the war—30,000 of infection or disease. Black soldiers served in artillery and infantry and performed all noncombat support functions that sustain an army, as well.
