How to find MSI model? Most MSI laptops have big sticker below the keyboard with model name written on it. If you don't have it, locate the sticker on the bottom of your laptop. If you don't have it, remove the battery and look for it in the battery compartment. Model name is usually written in the biggest font size and can start with MS-.

What model motherboard do I have? The easiest way to find out which motherboard you have is via the System Information tool, which ships with Windows by default. Hit the [Windows] + R keys to bring up the run command and type 'msinfo32' before hitting the OK button.

How do I check my MSI motherboard BIOS? Visit the official MSI website and navigate to your exact motherboard model's product page – be mindful that there often “Wi-Fi” and non-Wi-Fi motherboard models. From there, you'll navigate to the

“Support” page. Click on the “Driver & Downloads” tab. Under “BIOS”, you'll find a library of BIOS versions.

How do I match my CPU and motherboard? Pay attention to the supported CPU generations mentioned in your motherboard's specifications. Some motherboards may be backward compatible, meaning they support older generations, while others are limited to newer CPUs. It's essential to choose a CPU that falls within the specified range to ensure compatibility.

What happens if the CPU is not compatible with the motherboard? CPU socket compatibility is important because it determines whether your CPU and motherboard can work together or not. If you try to install a CPU that does not fit the socket, you may damage the pins or contacts, bend the CPU, or short-circuit the motherboard.

How do I choose a motherboard compatibility?
