#### Special Theory of Relativity MCQs Quiz

The special theory of relativity, developed by Albert Einstein in 1905, revolutionized our understanding of space, time, and the laws of physics. The following quiz tests your knowledge of this groundbreaking theory:

**Question 1:** According to the special theory of relativity, which of the following is an invariant? (a) Length (b) Time (c) Mass (d) Velocity

**Answer:** (d) Velocity

**Question 2:** What is the famous equation from the special theory of relativity that relates energy, mass, and the speed of light? (a)  $E=mc$  (b)  $E=mc^2$  (c)  $E=mv^2$  (d)  $E=hv$

**Answer:** (b)  $E=mc^2$

**Question 3:** Which of the following is a consequence of time dilation? (a) Clocks run faster for observers moving relative to each other. (b) Clocks run slower for observers moving relative to each other. (c) Clocks stop running for observers moving at the speed of light. (d) Clocks run at the same rate for all observers.

**Answer:** (b) Clocks run slower for observers moving relative to each other.

**Question 4:** What is the "twin paradox" in special relativity? (a) One twin travels at a high speed while the other remains on Earth, and they reunite to find that the high-speed twin has aged less. (b) One twin travels at a high speed while the other

remains on Earth, and they reunite to find that the high-speed twin has aged more. (c) One twin travels at a high speed while the other remains on Earth, and they reunite to find that they have both aged the same amount. (d) One twin travels at a high speed while the other remains on Earth, and they never reunite.

**Answer:** (a) One twin travels at a high speed while the other remains on Earth, and they reunite to find that the high-speed twin has aged less.

**Question 5:** Which of the following is NOT a postulate of the special theory of relativity? (a) The laws of physics are the same for all observers in uniform motion. (b) The speed of light in a vacuum is the same for all observers, regardless of the motion of the light source or observer. (c) The speed of light is infinite. (d) Mass and energy are equivalent.

**Answer:** (c) The speed of light is infinite.
