

Agricultural science grade12 caps notes

Download Complete File

What are the topics for Grade 12 Agricultural Science Paper 2? Paper 1 deals with topics: Animal Nutrition, Animal Production, protection and control and Animal Reproduction. Paper 2 deals with Basic Genetics, Production Factors and Agricultural Management and Marketing.

What is the alimentary canal of animal nutrition? Animal digestion begins in the mouth, then moves through the pharynx, into the esophagus, and then into the stomach and small intestine. Nutrients are absorbed in the small intestine and waste is prepared for elimination in the large intestine.

What is the meaning of agricultural science? agricultural sciences, sciences dealing with food and fibre production and processing. They include the technologies of soil cultivation, crop cultivation and harvesting, animal production, and the processing of plant and animal products for human consumption and use.

What is the abbreviations of the Journal of Agricultural Science? The abbreviation of the journal title "Journal of agricultural science" is "J. Agric. Sci.".

What are the topics for Grade 2?

What topic is agriculture chemistry? Agricultural Chemistry is a branch of chemistry that explains the chemical and biochemical ongoing processes in soil and plant. It also covers the areas regarding mineral nutrients, applications of fertilizers, and soil fertility related to product yield enhancement.

What are the five types of animal nutrition? The nutrients used by animals include carbohydrates, lipids, nucleic acids, proteins, minerals, and vitamins. Carbohydrates are the basic source of energy for all animals.

What are the 5 steps of nutrition in animals?

What are the 7 classes of food?

What technology is used in agriculture? Precision agriculture uses technologies such as GPS or automation to make farms more efficient. For example, farmers can use auto-steering equipment to precisely plant a field, and activity monitors can help dairy farmers collect data about their cows' health.

What is the meaning of crops in agricultural science? A crop is a plant or plant product that can be grown and harvested for profit or subsistence.

What does agri mean in biology? Agriculture is the art or science of growing food and cash crops for the consumption of human beings. In Latin, 'agri' means 'field' and 'culture' means 'cultivation', and refers to the set of work performed on land to produce food and maintain livestock.

What is the abbreviation for Agriculture? "Ag." Merriam-Webster.com Dictionary, Merriam-Webster, <https://www.merriam-webster.com/dictionary/ag>.

What is the abbreviation for agricultural science digest? The Agricultural Science Digest (ASD) is a peer-reviewed international journal that publishes original research articles, reviews, and a short notes on all aspects of agricultural and veterinary research.

What is a journal in Agricultural Science? The Journal of Agricultural Science publishes papers concerned with the advance of agriculture and the use of land resources throughout the world.

How do I prepare for Grade 2?

What are the objectives for science Grade 2? Second Grade Science Objectives
This year, they will start making detailed observations, drawing conclusions from data, and even learn how to make use of the information they gather. Some of the specific goals for second grade science include: Demonstrating scientific reasoning and logic.

What are the lessons in Grade 2 science? The Grade 2 Science course investigates animal life, plant life, weather, water, and physics, as well as technology and astronomy.

What are the three main chemicals used in agriculture? Many farmers choose to use chemicals to keep weeds and pests from destroying their crops and to add more nutrients to the soil. There are three different kinds of pesticides; herbicides, insecticides and fungicides. All three of these pesticides are used to kill different kinds of pests that can be found on a farm.

What is the basic agricultural chemistry? Agricultural chemistry is a science concerned with ways to influence chemical and biochemical processes in soil and plants, with plant mineral nutrition and with using fertilizers and other chemical means to improve fertility and increase yield.

What is green chemistry in agriculture? The goal is to balance higher manufacturing output with environmental cleanliness. Green Chemistry promotes cleaner technologies for eco-friendly production of essential goods and services. These technologies are crucial for sustainable agriculture, minimizing environmental impacts and boosting crop efficiency [1,2].

Which topics are in life science paper 1 grade 12?

What is the best subject combination for agriculture? UTME Subject combination for Agriculture: Chemistry, Biology/Agriculture and any one of Physics or Mathematics. NOTE: Kindly make references to JAMB Brochure for remarks/waiver for Agriculture. [CLICK HERE TO ACCESS JAMB BROCHURE.](#)
