The Making of Pakistan: A Study in Nationalism (K.K. Aziz)

1. What is the central thesis of K.K. Aziz's book "The Making of Pakistan"?

Answer: Aziz argues that the creation of Pakistan was not merely a political event but a culmination of a long-standing nationalist movement driven by the desire for Muslim self-determination.

2. How does Aziz trace the origins of Muslim nationalism in British India?

Answer: Aziz traces the roots of Muslim nationalism to the late 18th and early 19th centuries, when British imperial expansion and the decline of the Mughal Empire led to social and economic changes that sparked a sense of alienation among Muslim elites. He identifies the Wahhabi movement as a key early influence in shaping Muslim political consciousness.

3. What were the key events that contributed to the growth of Muslim nationalism?

Answer: Aziz highlights events such as the partition of Bengal in 1905, the Morley-Minto Reforms in 1909, and the Lucknow Pact in 1916 as milestones in the development of Muslim nationalism. These events led to the formation of Muslim political organizations, such as the Muslim League, and increased Muslim demands for self-government and representation.

4. How did World War I and the aftermath impact Muslim nationalist aspirations?

Answer: Aziz argues that World War I and the collapse of the Ottoman Empire had a profound impact on Muslim nationalism. The war disillusioned many Muslims about the British and led to a desire for greater autonomy. The subsequent Khilafat Movement further galvanized Muslim support for self-determination.

5. What factors ultimately led to the creation of Pakistan?

Answer: Aziz identifies a combination of factors, including the failure of the Muslim League-Congress negotiations, the increasing influence of the All-India Muslim League under Muhammad Ali Jinnah, and the post-war political vacuum in British India as the ultimate catalyst for the creation of Pakistan. He emphasizes the role of Jinnah's leadership and the popular support for the Muslim League in the final push towards independence.

Teaching Inquiry Science in Middle and Secondary Schools
