Source: API RP 7G, Recommended Practice for Drill Stem Design and Operating Limits, Upstream Segment, Sixteenth Edition, August 1998 (Addendum 2: September 2009).

What is a shoulder connection? Your shoulder joints are located at the top of your arm. They connect your arms to your torso. Your acromioclavicular joint connects your collarbone and your shoulder blade. Below your acromioclavicular joint is your glenohumeral joint that connects your upper arm bone and your shoulder blade.

What is the difference between a rotary joint and a rotary union? A rotary joint can also be called a rotary union or swivel. It is an equipment that offers an interface which permits fluid media- air, steam, or liquid- to be transferred between a rotating component and a static component. The basic parts of a rotary joint are the body or housing, shaft, guide, and seal.

What is the purpose of a rotary joint? A rotary joint, also referred to as a rotary union or rotating union, is a rotary sealing device that connects rotating equipment to fixed piping for the transfer of steam, water, thermal oil, coolant, hydraulic oil, air, and other media.

What is the difference between a rotary joint and a swivel joint? Rotary unions are used to transfer media from a stationary source to rotating machinery. Swivel joints are used for connecting fixed pipes with rotating pipes, fixed pipes with linear action pipes, and linear action pipes with rotating pipes.

What is a rotary switch wiring? Rotary switches are used to connect a functional circuit within a device to a source of electricity. The electrical charge enters the switch and is then directed to whichever circuit is currently selected by the switch.

What is a rotary cutter attachment? A rotary cutter for a tractor is a type of farming equipment that is commonly used for cutting grass, weeds, and brush on a farm or other agricultural property. Also known as a bush hog or brush hog, a rotary cutter is attached to the back of a tractor and uses one or more spinning blades to cut vegetation.
