What was the point of The Unbearable Lightness of Being? The title of the book, "The Unbearable Lightness of Being," explores the philosophical concept of lightness and heaviness. "Life which disappears once and for all, which does not return" writes Kundera, is "without weight...and whether it was horrible, beautiful, or sublime...means nothing." Each life is insignificant; every decision does not matter. Since decisions do not matter, they are "light": they do not tie us down.

What does the ending of The Unbearable Lightness of Being mean? Kundera ends The Unbearable Lightness of Being with a touching optimism. The story is set against the background of the Prague Spring of June 1968, the Soviet invasion of the country that followed in August, and the aftermath of the crackdown on liberalization. The tale begins on a philosophical note, discussing Friedrich Nietzsche's concept of eternal return (or eternal recurrence).

What does the sunset of dissolution mean? "The sunset of dissolution" refers to the end of something, an event dissolving into history. In a world where events recur infinitely, or where people believed this to be the case, no such sunset would exist, and we would feel no nostalgia for great and terrible events like the French Revolution and its aftermath.

What happens but once might as well not have happened at all? What happens but once, says the German adage, might as well not have happened at all. If we have only one life to live, we might as well not have lived at all.
