Shifting the Monkey: Protecting Good People from Slackers

"Shifting the Monkey: The Art of Protecting Good People from Liars, Criers, and Other Slackers" by Jim Thompson is a practical guide for school leaders on how to deal with difficult employees. Thompson argues that leaders must stop "carrying the monkey" for these individuals and instead hold them accountable for their own actions.

Key Questions:

- What is the "monkey"?
- Why is it important for leaders to stop carrying the monkey?
- How can leaders hold difficult employees accountable?

Answer:

What is the "monkey"?

The "monkey" is a metaphor for the problems and responsibilities that difficult employees unload onto others. These individuals may be chronically late, fail to meet deadlines, or make excuses for their poor performance. By "carrying the monkey," leaders inadvertently enable these employees to avoid consequences for their actions.

Why is it important for leaders to stop carrying the monkey?

Carrying the monkey can lead to burnout, resentment, and decreased morale among high-performing employees. It also creates a culture of mediocrity and low expectations. Leaders must stop carrying the monkey in order to create a positive and productive work environment.

How can leaders hold difficult employees accountable?

Thompson offers several strategies for holding difficult employees accountable, including:

- **Setting clear expectations:** Establish clear performance standards and make sure that employees are aware of the consequences for not meeting them.
- **Providing feedback:** Give employees regular feedback on their performance, both positive and negative.
- **Delegating tasks:** Assign tasks that are commensurate with employees' skills and abilities and let them take ownership of their work.
- **Dealing with performance issues:** Address performance issues promptly and fairly. Use documentation to support your concerns and provide opportunities for improvement.
- **Enforcing consequences:** If an employee does not improve after being given the opportunity to do so, it may be necessary to enforce consequences, such as a written warning or suspension.

By shifting the monkey and holding difficult employees accountable, school leaders can create a more positive and productive work environment for their good

employees.
