SAD is essential for ensuring that the resulting system meets the needs of the organization.

Question: What are the key phases in SAD? **Answer:** The key phases in SAD are:

- **Planning:** Define the project scope, gather requirements, and establish a project plan.
- **Analysis:** Study the current system, identify pain points, and develop a model of the new system.
- **Design:** Create detailed specifications for the new system, including data structures, processes, and user interfaces.
- **Implementation:** Develop, test, and deploy the new system.
- **Maintenance:** Monitor and make modifications to the system to ensure ongoing functionality.
