To Save Everything: Technology Solutionism and the Urge to Fix Problems That Don't Exist

In an era characterized by rapid technological advancements, we often find ourselves drawn to solutions that promise to simplify and enhance our lives. However, it is essential to question whether all technological solutions are truly

necessary or effective. The concept of "solutionism" refers to the tendency to rely on technology to solve every problem, regardless of its complexity or appropriateness.

Q: What is technology solutionism? A: Technology solutionism is the belief that technology can solve any problem, even those that are not well-defined or may not actually exist. It assumes that technology is always the best answer, without considering potential unintended consequences or the need for human involvement.

Q: Why is technology solutionism a concern? A: Solutionism can lead us to overlook simpler, more cost-effective, or more sustainable solutions. It can also create a false sense of security, leading us to believe that technology can magically fix any problem without addressing the underlying causes.

Q: What are the downsides to technology solutionism? A: Solutionism can:

- Foster a culture of laziness and dependence on technology
- Ignore the importance of human ingenuity and creativity
- Divert resources away from more pressing issues
- Entrench existing biases and inequalities

Q: Are there any benefits to technology solutionism? A: While solutionism can be problematic, it can also serve as a catalyst for innovation and progress. When used responsibly, technology can provide valuable tools for addressing genuine problems and improving our lives.

Q: How can we avoid the pitfalls of technology solutionism? A: To avoid the pitfalls of solutionism, it is crucial to critically evaluate technological solutions, consider their potential consequences, and ensure that they are truly addressing real problems. We must also foster a culture that values critical thinking, problem-solving, and creativity, both with and without the aid of technology.
