The Flat World and Education: How America's Commitment to Equity Will Determine Our Future

By Linda Darling-Hammond

Question 1: How is globalization impacting education and workforce preparation?

Answer: Globalization creates a "flat world" where knowledge, ideas, and jobs flow across borders. This requires a workforce with critical thinking, problem-solving, and collaboration skills to compete in a global economy. Education must prepare students for this interconnected and competitive environment.

Question 2: What is the role of equity in education?

Answer: Equity ensures that all students have equal access to quality education and opportunities to succeed. It means closing achievement gaps based on race,

ethnicity, socioeconomic status, or other factors. By investing in equity, we can create a more just and prosperous society.

Question 3: How is America's commitment to equity reflected in its education policies?

Answer: Initiatives such as Title I and Head Start aim to provide additional support to students from underserved communities. However, these programs often face funding challenges and systemic barriers. Fully committing to equity requires prioritizing funding, addressing inequalities in teacher preparation, and implementing evidence-based practices.

Question 4: What are the consequences of not investing in equity in education?

Answer: Inequitable education systems perpetuate social and economic disparities. Students from underrepresented groups are less likely to graduate from high school and college, have lower earning potential, and face higher rates of unemployment. This undermines our nation's economic growth and prevents us from achieving our full potential.

Question 5: What steps can we take to advance equity in education?

Answer: To create a more equitable education system, we need to:

- Increase funding for schools in underserved communities
- Recruit and retain a diverse teaching force
- Implement high-quality early childhood education programs
- Provide wraparound services to support students in need
- Hold schools accountable for closing achievement gaps

By investing in equity in education, we can ensure that all students have the opportunity to fulfill their potential and contribute to a thriving future for America.
