**How to improve communication skills?**

**What are the two major types of communication?** Communication can be categorized into three basic types: (1) verbal communication, in which you listen to a person to understand their meaning; (2) written communication, in which you read their meaning; and (3) nonverbal communication, in which you observe a person and infer meaning.

**What is the final step in the communication process?** Feedback is the final link in the chain of the communication process. The signal may take the form of a spoken comment, a long sigh, a written message, a smile, or some other action.

**What is the ultimate goal of communication?** The goal of communication is to convey information—and the understanding of that information—from one person or group to another person or group.
