What is ISO 27002 2013? ISO/IEC 27002:2013 gives guidelines for organizational information security standards and information security management practices including the selection, implementation and management of controls taking into consideration the organization's information security risk environment(s).

What is the difference between ISO 27002 2013 and 2022? Put simply, ISO 27002 provides guidance on the implementation of controls from ISO 27001 Annex A. Most recently—on February 15, 2022—ISO 27002: 2013 was updated to 27002: 2022. The biggest differences include changes made to Annex A, the grouping of domains, and the introduction of new controls.

What is the current version of ISO 27002? ISO 27002:2022 Broadened Scope Previously, ISO 27002:2013 was titled "Information technology – Security techniques – Code of practice for information security controls". The standard is now called "Information security, Cybersecurity and privacy protection – Information security controls" in the 2022 revision.

What's the difference between the old and current ISO 27002 standards? The major change to ISO 27002 (and therefore ISO 27001) is that the total number of Annex A controls was reduced from 114 to 93. However, none of the previous controls were removed. 57 were simply merged into 24 controls. 11 controls were added.

What is the difference between ISO 27001 and 27002? ISO 27001 is the standard for international information security management, and ISO 27002 is a supporting standard that guides how the information security controls can be implemented. Note it is only possible to certify to ISO standards that end in a "1".

What is the difference between NIST and ISO 27002? The primary difference that I have come across regarding NIST CSF and 27002 is that NIST was created to help US Federal agencies and organisations manage cyber-risk. At the same time, 27002 is an international approach to managing information security risk.

Is ISO 27002 mandatory? ISO 27001 has Mandatory Clauses Also, ISO 27002 controls aren't compulsory. They are, at best, a reference set of information security controls that organizations can use.

Is ISO 27001 2013 outdated? All organizations must transition to the new ISO 27001:2022 standard no later than October 31, 2025, regardless of the original registration date. All remaining ISO 27001:2013 certificates will be withdrawn and considered to be expired as of October 25, 2023, regardless of the original certification date.

Which is the primary focus of the ISO 27002 standard? ISO 27002 focuses its guidance on "determining and implementing controls for information security risk treatment in an information security management system (ISMS) based on ISO 27001." ISO 27003 focuses its guidance more broadly on the overall requirements for an ISMS, based on ISO 27001.

How much does ISO 27002 cost? Preparation costs It costs $350 in total: $125 for the ISO 27001 standard and $225 for ISO 27002, the implementation guide for ISO 27001.

Is Cobit the same as ISO 27002? ISO 27002 has a clear structure that can be applied and implemented completely on an organization with a guarantee of the overall safety of information security that is missing in ITIL and COBIT. The ISO-27002 has features to preserve the confidentiality, integrity and availability of the information in organizations.

How many domains are there in ISO 27002? In its latest edition, ISO/IEC 27002 includes 93 controls, spread across four domains, with some controls merged and 11 new controls added to enhance security.

What is the purpose of ISO IEC 27002 2013? The purpose of ISO 27002 is to provide guidance on how to develop and implement an ISMS. It supports the

ISO/IEC 27001 standard and contains a set of security controls that organizations can implement to protect their information assets.

What is the difference between ISO 27001:2013 and 2022? Updation to the Structure of Annex A Controls The update from ISO 27001:2013 to ISO 27001:2022 modernizes and simplifies the framework, aligning it with current information security risks and technologies through a restructured organization of controls.

Which are the two main changes from the ISO 27001:2013 version to 2022 version? Overall, when compared to the 2013 version, the changes in ISO 27001:2022 are moderate. Some of the main updates of ISO/1EC 27001:2022 include a major change of Annex A, a change in the title of the standards and a minor update of the clauses.

Can you be certified to ISO 27002? No, ISO/IEC 27002 provides best practice recommendations and cannot be certified to. But organizations can get certified to ISO/IEC 27001 which references ISO/IEC 27002 guidance.

Why is ISO 27002 relevant to cyber defense?
