Section 11.4 Meiosis Worksheet Answers

Question 1: What is the purpose of meiosis? Answer: The purpose of meiosis is to produce gametes (eggs and sperm) with half the number of chromosomes as the parent cell.

Question 2: Describe the four stages of meiosis. Answer: The four stages of meiosis are:

- Prophase I: The chromosomes condense and the homologous chromosomes pair up.
- Metaphase I: The homologous chromosomes line up in the middle of the cell.
- Anaphase I: The homologous chromosomes separate and move to opposite ends of the cell.
- Telophase I and Cytokinesis: The chromosomes reach the poles of the cell and two daughter cells are formed.

Question 3: How many chromosomes are in a typical human gamete? Answer: A typical human gamete has 23 chromosomes, half the number of chromosomes as a typical human somatic cell.

Question 4: What is the difference between mitosis and meiosis? Answer: Mitosis is the process of cell division that produces two daughter cells that are genetically identical to the parent cell. Meiosis is the process of cell division that

produces four daughter cells that are genetically different from the parent cell.

Question 5: Explain the significance of genetic recombination in meiosis. Answer: Genetic recombination is the process of exchanging genetic material between homologous chromosomes during meiosis. This process shuffles the genes and creates new combinations of alleles. Genetic recombination contributes to genetic diversity and ensures that offspring are genetically different from their parents.

Question 1: How can I send data from an Arduino to MIT App Inventor 2 via Bluetooth?

Answer:

To initiate data transfer, you'll need the App Inventor BluetoothClient component and an Arduino with Bluetooth capabilities. Connect the Arduino's TX pin to the Bluetooth module's RX pin, and the Arduino's RX pin to the Bluetooth module's TX pin. Establish Bluetooth communication between the two devices. Then, use the SendText method within the BluetoothClient component to transmit data from the Arduino to App Inventor 2.

Question 2: What is the Arduino code for sending data?

Answer:

Here's a sample Arduino code:

```
void setup() {
  Serial.begin(9600); // Set baud rate
}

void loop() {
  String data = "Hello from Arduino";
  Serial.println(data); // Send data over Bluetooth
  delay(100); // Delay between data transmissions
}
```

Question 3: How do I receive data in App Inventor 2?

Answer:

In App Inventor 2, use the When BluetoothClient GotText event handler within the BluetoothClient component. This event triggers when data is received from the Arduino. Within the event handler, you can store the received data in variables for further processing.

Question 4: Can I send data of different types?

Answer:

Yes, you can send data of various types, including text, numbers, and arrays. When sending numbers or arrays, you'll need to convert them into strings for transmission. Use the corresponding parsing methods on the App Inventor side to retrieve the data in the desired format.

Question 5: How do I handle Bluetooth connection interruptions?

Answer:

Implement error-handling mechanisms for Bluetooth connection issues. Use the When BluetoothClient Error event handler to monitor for connection problems. Within the event handler, you can display error messages or reconnect the devices if necessary.

What year was the international DT466? The DT466 first appeared in the 1973 4366 four-wheel drive tractor, a co-development of IH and Steiger. All three of these engines had a history of stellar service in the IH tractor lines, even a little past when the ag side of IH was sold off and became Case IH.

How many liters is a DT466 International engine?

What engine is a DT466E? The Navistar MaxxForce DT466E 7.6L (466ci) inline-six engine's most powerful variant makes 860 lb-ft of torque at 1,300 rpm and 300 hp at 2,200 rpm.

What brand is a DT466? From '93 to '96, Navistar manufactured the DT466P iteration of the engine, which produced between 175 and 230 horsepower and between 520 and 620 pound-feet of torque. The last year Navistar built a mechanical fuel-injected DT466 was 1993.

What is the life expectancy of a DT466 engine? The DT466 is a very durable engine, and many examples have surpassed 1 million miles. However, the lifespan of a DT466 will vary depending on how well it is maintained.

What does DT stand for in DT466? Posted 1/4/2011 22:42. Subject: Re: What does the DT as in DT466 stand for? Been told Diesel Turbo.

How reliable is the DT466 engine?

How much horsepower can you get out of a DT466? From the factory the DT466 could be purchased in trucks with HP options up to 250-275 HP. If you choose to increase much more than that you will start to have some reliability issues. How much you can increase depends on several isses.

Is the DT466 a wet sleeve engine? Use of wet sleeve cylinder liners was what set the DT466 apart from other medium-duty engines at the time.

Can you tune a DT466 engine? Due to the similarities in engine management and HEUI Injection, we are also able to provide tuning for the VT275, VT365, DT466, DT530, and DT570 applications as well, achieving similar gains in performance and economy.

How can you tell the difference between DT466 and DT466e? Hi Luke, the Dt466 is a mechanical engine while the DT466e is has an ecm to control engine functions.

Is a DT466 a Detroit? As far as I know the DT-466 and DT-530 engines were distributed by Detroit Diesel as the 40 series and by Perkins as the 1306 series, but I never heard about the name "Detroit Diesel by Perkins" ...

How many horsepower is a DT466? Horsepower and Torque Ratings Here are some general ratings for each version: DT466: 145-260 horsepower, 380-800 lb-ft of torque. DT466P: 175-230 horsepower, 520-620 lb-ft of torque.

Does a DT466 have liners? I had the liner orings fail recently on my 1988 DT-466 in a S1900 IH truck. I have never done an inframe on a 466 before but it has been going well, new liners, pistons, bearings all went in without too much grief. Liner protrusion was all equal with one another.

What is the fuel consumption of a DT466 engine? The dt 466 was the most economical engine we have ever used during beet harvest. I haul about 550bu a load-so more like 24 tons loaded-13 tons of grain. Average over about 1500 miles this fall was about 6 mpg. That was with an automatic transmission, 80% country roads with some small hills.

How hot is too hot for a DT466? The engine should run all day at about 190 deg. If the engine temp rises then the cooling fan should come on around 210 deg. If the gauge goes to 210 deg and then does not cool down then most likely you have poor cooling in the radiator and the fan hub is not engaging the fan due to lack of heat.

What is the longest lasting diesel engine?

How many hours should a diesel engine last? As a rough guide the average lifespan of a diesel engine can vary from 5,000 hours to 20,000 hours, assuming it's maintained properly. In terms of mileage, that equates to 300,000 miles to 100,000 miles. Properly maintained, under standard working conditions, a diesel engine can last a long, long time!
