Unlocking Value through Electronic Mobile Commerce

Creating Value

Electronic mobile commerce (m-commerce) has emerged as a transformative force, enabling businesses to reach customers anytime, anywhere. One key aspect is the ability to create value through innovative strategies. Customers benefit from convenience, personalized experiences, and access to a wide range of products and services. Businesses, on the other hand, can gain competitive advantage, increase revenue, and build stronger relationships with their customers.

Strategies

To effectively create value through m-commerce, businesses can employ various strategies. Some key approaches include:

- **Mobile-Optimized Website:** Designing a mobile-friendly website that provides a seamless and efficient shopping experience for customers.
- **Mobile Application:** Developing a dedicated mobile application that offers additional features and functionality tailored to the unique needs of mobile users.

- **Mobile Marketing:** Utilizing mobile channels to engage with customers, promote products, and drive conversions.
- **Location-Based Services:** Leveraging GPS and other location-based technologies to provide personalized experiences based on a customer's physical location.

Cases

Numerous successful cases demonstrate the value-creating potential of m-commerce strategies. For instance, Amazon's mobile application enables customers to browse, purchase, and track orders with ease, leading to increased convenience and customer satisfaction. Starbucks' mobile app allows customers to order and pay for their drinks ahead of time, reducing waiting times and enhancing the overall experience.
