How to prepare JavaScript for an interview?

How to test JavaScript skills?

What is the difference between == and === in JavaScript interview questions? The main difference between the two operators is how they compare values. The == operator compares the values of two variables after performing type conversion if necessary. On the other hand, the === operator compares the values of two variables without performing type conversion.

Is JavaScript front-end or backend? Front-end devs use front-end programming languages like HTML, CSS, and JavaScript.

What is JavaScript in one word? JavaScript is a lightweight interpreted programming language. The web browser receives the JavaScript code in its original text form and runs the script from that.

How many data types are in JavaScript? JavaScript data types are broadly categorized into primitive and non-primitive types. The primitive data types include Number, String, Boolean, Null, Undefined, and Symbol. Non-primitive types include Object, Array, and Function.

What basic knowledge is required for JavaScript? Before learning JavaScript, you must know how to code with Hypertext Markup Language (HTML) and Cascading Style Sheets (CSS). That's because these two tools are fundamental to web development. HTML provides the basic framework for websites, and CSS adds styling elements, like font color, size, and layout.

How do you memorize a script for an interview?

What tool to test JavaScript? Jest is a JavaScript testing framework designed to ensure correctness of any JavaScript codebase. It allows you to write tests with an approachable, familiar and feature-rich API that gives you results quickly.

How can I practice my JavaScript?

How to check keys in JavaScript? To properly check if a key exists in JavaScript, we suggest using the in operator or hasOwnProperty() . These ways are more reliable for checking keys. "The best way to check the presence of a key in an object is by using the in operator or the hasOwnProperty() method."

How to crack a JavaScript interview?

What is a JavaScript short answer? JavaScript is an open-source programming language. It is designed for creating web-centric applications. It is lightweight and interpreted, which makes it much faster than other languages. JavaScript is integrated with HTML, which makes it easier to implement JavaScript in web applications.

What does !== mean in JavaScript? !== means "not equal value or not equal type". It is a comparison operator in JavaScript that checks if the two values being compared are not equal in either value or data type. For example, 5 !== "5" would return true because although the values are the same, the data types are not.

Is CSS backend or frontend? The frontend uses HTML, CSS, JavaScript, and frontend frameworks. The backend uses programming languages like Java, Python, Ruby, APIs, and database management systems.

Is SQL backend or frontend? SQL is the most common backend language. It is used to interact with databases and to create and maintain relational databases.

Which is harder, frontend or backend? Backend development can be more challenging to start, but once you understand the languages and processes involved, it can be easier to proceed because there are fewer technologies to learn. On the whole, however, frontend development is typically the easier subject to learn.

How to say hello word in JavaScript? console. log('Hello, World! '); prints the 'Hello, World!'

Is JavaScript synchronous or asynchronous? JavaScript is synchronous by default: every line of code is executed one after the other, and each task must wait for the previous one to be completed before moving to the next. In the above example, the first line of code, One , will be logged first, followed by the second line, Two , and the third line, Three .

Why is JavaScript called script? JavaScript is a scripting language that can control or change web pages and web servers. It is interpreted, which means it can run as it is, without any extra steps. It can also use dynamic execution, which means it can run some instructions in a different or better way than they are written.

What are the 7 data types in JavaScript?

What is the difference between == and === in JS? Basically, the only real difference is that === includes the type in the comparison; whereas == is just the value.

What are the six types of values in JavaScript? Numbers represent numeric values, strings represent text, booleans represent true or false values, arrays store multiple values in an ordered list, objects store key-value pairs, null represents the intentional absence of any object value, and undefined represents the absence of a defined value.

What is JavaScript in simple terms? JavaScript is a scripting language for creating dynamic web page content. It creates elements for improving site visitors' interaction with web pages, such as dropdown menus, animated graphics, and dynamic

background colors.

What is JavaScript simple description? JavaScript is a programming language that adds interactivity to your website. This happens in games, in the behavior of responses when buttons are pressed or with data entry on forms; with dynamic styling; with animation, etc.

How do you explain JavaScript to a child? JavaScript is known as the 'programming language of the web'. It is used by front-end developers in combination with HTML and CSS to make up the core components of web technology; JavaScript programs the interactivity of a website, HTML the structure, and CSS the style.

What is JavaScript for beginners? JavaScript is a lightweight programming language commonly used by web developers to add dynamic interactions to web pages, applications, servers, and even games. It works seamlessly alongside HTML and CSS, complementing CSS in formatting HTML elements while providing user interaction, a capability that CSS alone lacks.

Why do we use === in JavaScript? The strict equality (===) operator checks whether its two operands are equal, returning a Boolean result. Unlike the equality operator, the strict equality operator always considers operands of different types to be different.

What is the main purpose of JavaScript? JavaScript is a programming language used to create dynamic content for websites. It achieves this by adding new HTML elements while modifying existing ones. Many coders enhance web development skills using JavaScript to create user-friendly and interactive websites.

What is the most common use of JavaScript? JavaScript is commonly used to make web pages dynamic. As a client scripting language, it provides websites with interactivity like prompts and alerts and it can add animations to images and text. BairesDev's development of web apps for MTV provides a good example of JavaScript being used in web development.

How exactly JavaScript works? JavaScript code is executed by the browser or JavaScript engine rather than being compiled into machine language beforehand.

This makes it highly portable across different platforms. Modern engines such as V8 utilize Just-In-Time (JIT) technology to compile code into directly executable machine code.

What is the basic concept of JavaScript?

What is JavaScript example? JavaScript provides users to interact with web pages as per the below examples as per the requirements. Show/hide more data or user information using with the click of a button. Change the color of a button after hovering the mouse hovers over it. Slide by a carousel of images on the home webpage.

How does JavaScript read? The source code is passed through a program called a compiler, which translates it into bytecode that the machine understands and can execute. In contrast, JavaScript has no compilation step. Instead, an interpreter in the browser reads over the JavaScript code, interprets each line, and runs it.

What is function in JavaScript in simple words? A function in JavaScript is similar to a procedure—a set of statements that performs a task or calculates a value, but for a procedure to qualify as a function, it should take some input and return an output where there is some obvious relationship between the input and the output.

What is a monkey code in JavaScript? Monkey patching in JavaScript refers to the practice of modifying or extending the behavior of existing objects or functions at runtime. It involves adding, modifying, or overriding properties and methods of an object without altering its original source code.

What is JavaScript in easy words? JavaScript is a dynamic programming language that's used for web development, in web applications, for game development, and lots more. It allows you to implement dynamic features on web pages that cannot be done with only HTML and CSS.

What is a JavaScript short answer? JavaScript is an open-source programming language. It is designed for creating web-centric applications. It is lightweight and interpreted, which makes it much faster than other languages. JavaScript is integrated with HTML, which makes it easier to implement JavaScript in web

applications.

What is the easiest way to learn JavaScript? If you are a beginner, we recommend starting with an online course or video tutorial. There are many great resources available online, and you can learn at your own pace. Once you have a basic understanding of JavaScript, you can start working on personal projects or attending coding bootcamps to further your skills.

Tabel Berat Profil Baja: Panduan Lengkap untuk Insinyur Sipil

Pertanyaan 1: Apa itu profil baja?

Profil baja adalah elemen struktural yang dibuat dari baja yang dibentuk menjadi berbagai bentuk penampang, seperti I, H, atau tabung. Profil baja banyak digunakan dalam konstruksi bangunan, jembatan, dan struktur teknik lainnya karena kekuatan dan daya tahannya yang tinggi.

Pertanyaan 2: Apa pentingnya tabel berat profil baja?

Tabel berat profil baja memberikan informasi penting tentang berat per satuan panjang dari profil baja yang berbeda. Berat ini digunakan dalam perhitungan beban struktur, pemilihan material, dan desain anggota struktural.

Pertanyaan 3: Bagaimana cara membaca tabel berat profil baja?

Tabel berat profil baja biasanya mencakup kolom berikut:

- **Ukuran:** Dimensi penampang profil baja
- **Berat:** Berat per meter atau per kaki
- **Luas penampang:** Area penampang profil baja
- **Momen inersia:** Properti geometris yang menunjukkan ketahanan profil baja terhadap lentur

Pertanyaan 4: Apa saja jenis profil baja yang umum?

Jenis profil baja yang umum meliputi:

- Balok I

- Balok H

- Saluran C

- Saluran Z

- Tabung persegi panjang

- Tabung bulat

Pertanyaan 5: Di mana saya dapat menemukan tabel berat profil baja?

Tabel berat profil baja dapat ditemukan di berbagai sumber, termasuk:

- Produsen baja

- Buku panduan dan kode teknik

- Situs web teknik sipil

- Perangkat lunak desain struktural

What are the tips for the game Neil Strauss?

What is the summary of the game by Neil Strauss? The Game (2005) gives readers an inside look into the "pickup community" frequented by men desperate to convince women to sleep with them. These blinks share the advice of a leading seduction guru, and the less than great consequences of his successes.

What are the rules for the game dirty minds? A player draws a card, and reads one of the facts about the word (they may choose). Then the other player gets to make one free guess. If they're right, they get three letter cards. If they're wrong, the other players get a chance to steal.

How do you win the game mind game? You can never truly win The Game. Anyone who hears someone else say they lost The Game also loses The Game, because they are now thinking about The Game. After losing, you start playing again.

What is negging in the rules of The Game? Another tactic, one for which The Game became particularly famous, was the art of "negging"—that is, giving a woman a semi-insulting compliment so that you a) distinguish yourself from the pack of people she's accustomed to have hitting on her, and b) slightly lower her self-esteem

to the point that she wants your ...

What does the rules of The Game short story symbolize? Overall, this story symbolizes an intricate game of chess Waverly plays with herself wherein she is her own most formidable adversary. She struggles with voicing her opinions or needs to her oftentimes intimidating mother, so the battle to create a self becomes an internal one—a battle she ultimately claims as her own.

What is the main message of the story rules of The Game? Summary: The main theme of "Rules of the Game" is the struggle for identity and independence. The story explores the protagonist's journey to assert herself and navigate the complexities of her cultural heritage and familial expectations while pursuing her passion for chess.

What are the rules of the mind game? Level 1 sees one card dealt to each player, level 2, two, and so on up to level 12. The players then attempt to place all the cards down, one at a time, in the centre of the table in ascending order. There are no turns; players play their cards as, and when they think theirs is the next in sequence.

What is the trick to the mind game? So, the trick is this: given there is only one card of each number from 1 to 100, you have an innate understanding of how long you're supposed to wait before playing a card. For instance, if you have the 1 card you know you need to play it first. If you have the 100 card you know you must play it last.

What are the rules 21? Players receive all cards face up and the dealer's first card is face up and the second is face down. The object of the game is to get closer to 21 than the dealer without going over 21. If a hand goes over 21, it is called a "bust" or "break" and the wager is lost. In 21, Jacks, Queens, Kings and 10s count as 10.

What are the rules for the brain game? In Brain Games, players take turns rolling a die to move 1-3 spaces and then try to pass the mind-bending challenge from the category (Logic, Language, Vision, or Mind & Body) they landed on to earn a token. The first player to get a token in each category wins the game!

What are the rules of a game? The rules of a game define how the game is played, what actions are allowed or prohibited, and how players should behave. They

provide a framework for the game and help to ensure that it is fair and enjoyable for all players. Rules are an integral part of games, and they serve a variety of purposes.

Why do people say I lost The Game? The Game is a mind game in which the objective is to avoid thinking about The Game itself. Thinking about The Game constitutes a loss, which must be announced each time it occurs. It is impossible to win most versions of The Game.
