Doctor Alfredo Ballí Treviño, a convicted murderer, was the inspiration for Lecter. Salazar is believed to be Alfredo Ballí Treviño, the last criminal to be condemned to death in Mexico, in 1959.

Why did Jodie Foster not do Hannibal? She told Games Radar in 2005: "The official reason I didn't do Hannibal is I was doing another movie, Flora Plum [a long-cherished project that has yet to be shot]. So I get to say, in a nice, dignified way, that I wasn't available when that movie was being shot.

Does Hannibal love Clarice? With this in mind, many readers protested when Thomas Harris ended his novel, Hannibal, with Clarice Starling and Hannibal Lecter becoming lovers. Solar Project Wiring Guide: A Comprehensive Q&A

Q1: What gauge wire should I use for my solar array? A: The gauge of wire you need will depend on the length of the run, the amperage of your solar panels, and the voltage drop you are willing to accept. Refer to the "PWBooks Solar Project Wiring Guide" for specific gauge recommendations based on these factors.

Q2: How do I connect my solar panels together? A: Solar panels can be connected in series or parallel to achieve the desired voltage and amperage. Series connections increase voltage, while parallel connections increase amperage. Ensure that the voltage and amperage ratings of your panels are compatible.

Q3: What type of connectors should I use for my solar system? A: MC4 connectors are the industry standard for solar panel connections. They are quick and easy to install, and they provide a weather-tight seal.

Q4: How do I calculate the length of wire I need? A: Measure the distance from your solar panels to your inverter, and then add 10% for slack. You should also consider the length of any other wires that will be connected to your system, such as battery cables.

Q5: What are the safety precautions I need to take when wiring my solar system? A: Always wear proper safety gear, including gloves, safety glasses, and a hard hat. Disconnect all power sources before starting any work. Ensure that your wiring is properly grounded and protected from the elements. Refer to the "PWBooks Solar Project Wiring Guide" for detailed safety instructions.
