**What is the beam methodology in agile?** BEAM? stands for Business Event Analysis & Modelling, and it's a methodology for gathering business requirements for Agile Data Warehouses and building those warehouses.

**What is the 7Ws dimensional model?** Telling dimensional data stories using the 7Ws (who, what, when, where, how many, why and how) Modeling by example not abstraction; using data story themes, not crow's feet, to describe detail.
**What are the 4 agile development methodologies?** Agile development methodology There are many different forms of the agile development method, including scrum, crystal, extreme programming (XP), and feature-driven development (FDD).

**What are the four pillars of Agile methodology?** The Agile Manifesto Pillars are: Individuals and Interactions over processes and tools. Working software over comprehensive documentation. Customer collaboration over contract negotiation. Responding to change over following a plan.

**What is Kimball's dimensional model?** Kimball dimensional modeling allows users to construct several star schemas to fulfill various reporting needs. The advantage of star schema is that small dimensional-table queries run instantaneously. To integrate data, Kimball approach to Data Warehouse lifecycle suggests the idea of conformed data dimensions.

**What is 11 dimension model?** 11 dimensions can be summed up as follows: 3 dimensions of Space we are familiar with, 1 dimension of Time, 6 curved/collapsed in dimensions going down to Strings in String Theory.

**What is the three-dimensional Guilford model?** three dimensions of intelligence postulated by Joy Paul Guilford to underlie individual differences in scores on intelligence tests, namely, contents, operations, and products. Each mental ability represents a combination of these three facets.
