Can you use Todoist for project management? Todoist is our go-to tool when it comes to project management. We've created a project template that gathers all tasks related to setting up and coordinating a squad over a 6-week cycle.

What are contexts in GTD? What are contexts? The use of contexts is a key element in the GTD methodology. A context defines what you need to be able to carry out an action, and it can be a place, a tool or a person.

What is the difference between task and project in GTD? Most of your goals can't be accomplished all in one sitting -- and when that's the case, what you're dealing with are projects -- not tasks. PROJECT = anything that takes *more* than *one step* to complete. TASK = anything that can be done in a single step and usually in a single sitting.

How do you handle projects in GTD? When you organize your system, identify the components of each project, their sequence and priorities. To keep a project in movement, you must decide what the next action steps are for each of its moving components. It's not necessary to plan the entire project from the beginning.

What is the first step in GTD? Capturing is the first step towards organizing your to-dos into a better productivity system. Make sure you're using a system that makes it easy to capture information. A key tenet of the GTD method is capturing information as soon as it enters your brain.
